

ALIGNER PHOTO INSTRUCTIONS

Wash your hands thoroughly for at least 20 seconds.

Find a well-lit room in your house. One with a lot of natural light is best where the light is facing you.

Place the cheek retractor with connecting loop towards your chin and not your nose.

Take the following **6 Photos** with your phone or camera. Make sure the flash is turned on. If you see a shadow over your teeth, please take them again. You may need to recruit a friend to help you.

With your Aligners in place.

1. Straight Forward photo biting on the edges of your front teeth
2. Photo showing the chewing surfaces of your top teeth
3. Photo showing the chewing surfaces of your bottom teeth

With your Aligners out

1. Photo of the teeth on the right side of your mouth while you are biting all the way down on your back teeth. Pull the cheek retractor to the side to be able to see your molars.
2. Photo of the teeth on the left side of your mouth while you are biting all the way down on your back teeth. Pull the cheek retractor to the side to be able to see your molars.

Follow these instructions to take the necessary photos for submitting a request to have your aligner tracking assessed virtually and receive your next set of aligners

After taking these photos please submit them to our office for Dr. Castilla to evaluate if you are eligible to receive your next aligners

You can text or email all 6 photos to our office.

Once the photos are received, one of Dr. Castilla's clinicians will be reaching out to you within 48 hours to discuss Dr. Castilla's recommendations for moving forward with your Invisalign treatment.
